**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, 11, 13-16, 18 and 20, drawn to an article packaging device, classified in class 53, subclass 568.
  - II. Claims 10, 12 and 17, drawn to a method for manually forming a packaged article, classified in class 53, subclass 459.
  - III. Claims 19, drawn to an apparatus for forming a pleated layered pack of a tubular sheet, classified in class 493, subclass 239.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as the one that does not include a casing with a casing wall around the body of the device.

3. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions such as:

Invention I is an article packaging device that has means for gathering the tubular sheet and separating the close packaged article of the tubular sheet.

Invention II is an apparatus for forming a pleated layered pack of tubular sheet that has a plunger capable of movement along the central mandrel and a reciprocating means having a connector affixed to the plunger.

4. Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as the one that does not have a plunger capable of movement along the central mandrel axis.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and by their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh K Truong whose telephone number is (703) 605-0423. The examiner can normally be reached on Mon-Thurs from 8:00 AM to 6:30 PM.
